# EDIT

This action displays a form of the existing instance of a business object to the user and waits for the user to provide the new values of the attributes.

## Syntax

EDIT `AttributIdentifier()`

where `AttributIdentifier()` must be either the name of the business object or the name of its reference attribute.

## Example

```
EDIT Account
```

or

```
EDIT Account.Type
```

### note

It is possible to optionally indicate the name of the specific form of the business object that will be used when editing the object, for example,

```
EDIT Account USING 'Form for administrators'
```

where 'Form for administrators' is the name of the form that must be configured with the Account object.

### note

It is possible to optionally indicate the name of the specific section of the business object that will be displayed first, for example:

```
EDIT Account USING 'Form for administrators' FORM_SECTION 'Personal details'
```
