MOBILE SUBSCRIBE

This action subscribes the mobile device of the user that he logged in from to receive push notifications from the system. This action only works in native mobile applications – it doesn't work in the browser.Notifications are sent by using the `MOBILE PUSH` command (see below). As the result of the successful subscription Aware IM automatically creates an instance of the MobilePhone object and puts it into the Context. The instance can then be used to send notifications to.

Example

```
MOBILE SUBSCRIBE LoggedInRegularUser.Phone = MobilePhome
```

See the Sending Push Notifications to Mobile Phones section for more details about push notifications.

37. Sending Push Notifications

How to build native mobile applications in AwareIM.
