INDEX_OF

Description

Returns an integer constant indicating the index of the first string within the second string. For example,

```
INDEX_OF('fox', 'red fox')
```

returns 5. If the first string is not contained within the second one 0 is returned.

Parameters

Two attributes of the Plain Text type or two string constants or calculations producing text. A third parameter can be optionally specified - this parameter indicates occurrence number of the first string in the second string.

Example

```
IF INDEX_OF('Smith', Account.Name) = 0 THEN ...
```
