PARSE_JSON

Description

Parses the specified string in JSON format and extracts a value according to the specified path

Parameters

Attribute of the Plain Text type or string constant or calculation producing text identifying the string in JSON format to parse and the path in JSONPath format (see https://github.com/json-path/JsonPath%23getting-startedhttps://github.com/json-path/JsonPath#getting-started) identifying a value to be extracted from JSON. Returns extracted value as a string
