PARSE_XML

Description

Parses the specified string in XML format and extracts a value according to the specified path

Parameters

Attribute of the Plain Text type or string constant or calculation producing text identifying the string in XML format to parse and the path in XPath format (see <https://www.w3.org/TR/1999/REC-xpath-19991116/>) identifying a value to be extracted from XML. Returns extracted value as a string
