Required With Owned By References

<columns 100% 4% 48%>

DO NOT PLACE TEXT HERE

<newcolumn>

Problem/Limitation Description

If two business objects are related through a parent/child relationship (see Reference Attributes) and the reference attribute to a child is defined as "Value must be provided" it is impossible to add a new child instance from a form of the parent instance using Add New button (see working_with_references_in_the_operation_mode)

<newcolumn>

Work Around

Do not force "Value must be provided" flag for reference attributes or create child instance first and then add it to a parent using Add button.

<newcolumn> </columns>
