

# Table of Contents

Undefined With Multiple References ..... 2

## Known Issues,, References, UNDEFINED

This is the template for INHERITED known issues pages - add a tag to Issue: to allow this to show on the tagged page

## Undefined With Multiple References

<columns 100% 4% 48%>

DO NOT PLACE TEXT HERE

<newcolumn>

### Problem/Limitation Description

Checking for UNDEFINED value of a multiple reference attribute (see Reference Attributes) in queries does not work correctly. For example, the following will not work:

```
FIND Account WHERE Account.Transactions IS UNDEFINED
```

<newcolumn>

### Work Around

Use EXISTS or COUNT expressions, for example

```
FIND Account WHERE COUNT Transaction WHERE (Transaction IN  
Account.Transactions) = 0
```

<newcolumn> </columns>
