Table of Contents

Known Issues,, References, UNDEFINED

This is the template for INHERITED known issues pages - add a tag to Issue: to allow this to show on the tagged page

Undefined With Multiple References

<columns 100% 4% 48%>

DO NOT PLACE TEXT HERE

<newcolumn>

Problem/Limitation Description

Checking for UNDEFINED value of a multiple reference attribute (see Reference Attributes) in queries does not work correctly. For example, the following will not work:

```
FIND Account WHERE Account.Transactions IS UNDEFINED
```

<newcolumn>

Work Around

Use EXISTS or COUNT expressions, for example

```
FIND Account WHERE COUNT Transaction WHERE (Transaction IN Account.Transactions) = 0
```

<newcolumn> </columns>
