Use Of IN With Complex Identifiers

This is a spacer column

Problem/Limitation Description

IN expressions using complex identifier of the reference list are not supported if used in subqueries. For example, the following query is not supported:

```
FIND Client WHERE (COUNT Account WHERE (Account IN Client.Carrier.Accounts) > 3)
```

Note that the following query is supported:

```
FIND Client WHERE (COUNT Account WHERE (Account IN Client.Accounts)>3)
```

This is a spacer column

Work Around

Avoid using such constructs in queries
