Oracle

IMPORTANT: Support for Oracle database is optional in **AwareIM**. Before integrating this database with AwareIM make sure that this option is available in your AwareIM edition.

You need to install Oracle database prior to using **AwareIM** as it is not included in the AwareIM installation. Before you can start using AwareIM with the Oracle database make sure you do the following:

1. **AwareIM** manages two databases named BASDB and BASDBTES. The databases must be created manually before using Oracle with **AwareIM**. **AwareIM** will NOT create the databases automatically. It is enough to create empty databases without creating any tables - **AwareIM** will create all the required tables automatically on the first startup.
2. Perform the steps to setup AwareIM connection with the Oracle database using the AwareIM Control Panel in a similar way as for MySQL or SQL Server databases described above. Or if AwareIM is installed as a service, perform manual integration in a similar fashion as described for MySQL and SQL Server databases.
