Database integration 2

Database integration

AwareIM requires database software to function correctly. At the moment **AwareIM** is compatible with the Apache Derby, MySQL, Microsoft SQL Server/Azure, Oracle, PostgreSQL and Maria DB databases¹⁾. MySQL, Maria DB, Oracle, PostgreSQL and MS SQL Server databases are not included in the **AwareIM** installation.

Apache Derby is included in **AwareIM** and does not require any additional integration.

- [MySQL](#)
- [MS SQL Server](#)
- [Oracle](#)
- [MS Azure, Maria DB & PostgreSQL](#)

¹⁾

Note that **AwareIM** can connect to any existing database through a JDBC driver. In this section we only refer to databases that **AwareIM** supports “natively”, i.e. it can create NEW applications using these databases.
