Database integration

AwareIM requires database software to function correctly. At the moment *AwareIM* is compatible with the Apache Derby, MySQL, Microsoft SQL Server/Azure, Oracle, PostgreSQL and Maria DB databases[1]. MySQL, Maria DB, Oracle, PostgreSQL and MS SQL Server databases are not included in the *AwareIM* installation.

Apache Derby is included in *AwareIM* and does not require any additional integration.

- MySQL
- MS SQL Server
- Oracle
- MS Azure, Maria DB & PostgreSQL

[1]

Note that *AwareIM* can connect to any existing database through a JDBC driver. In this section we only refer to databases that *AwareIM* supports "natively", i.e. it can create NEW applications using these databases.
