Table of Contents

Productivity Features

In the previous sections we described in detail how **AwareIM** implements the generic aspects of a data management application, such as data entry and editing, data storage, data retrieval, data processing and the user interface (see Basic Concepts). In the following section we will describe how **AwareIM** implements some other features that most applications are likely to require.

See:

- Access Control
- Working with Documents and Reports
- Communication with Other Systems
- Scheduling
- E-mail Handling
- Export and Import
- Setting Initial Values of the Application
- Extending AwareIM
- Performance Profiler
