Logging into the Operation Mode 2

Logging into the Operation Mode

You can log into the Operation Mode directly from the Configuration Tool – **Aware IM** will automatically launch the default Internet browser and show the login form for system administrators described in the [Full User Login, Interactive](#) table entry.

To login into the Operation Mode:

1. Select the Operation Mode Login command from the Tools menu.
2. **Aware IM** will launch the default browser and show the form to login as system administrator.

<note>By default **Aware IM** will use the following URL to connect to the Operation Mode:

<http://localhost:8080/AwareIM/logon.jsp>

If your system uses a different URL (for example, if the Configuration Tool is running on a separate machine from the Aware IM Server) you can specify this URL in the [Configuration Tool property file](#)</note>
