## DataPresentationTemplate class

This class represents the document template that most methods of the document type components work with. Below are the descriptions of some of the methods of this class that can be useful to the document type components (for the full list of methods see the JavaDoc API).

- [deepCopy \(\) / DataPresentationTemplate](#)
- [getAttributePaths \(\)](#)
- [getLoadedTemplate \(\)](#)
- [setAttributePaths \(String \[\] attributePaths\)](#)
