Data Maestro 2

[Index](#)

Data Maestro

To incorporate the Data Maestro AI Assistant into your application you need to do the following:

1. Enter a detailed description of your application into AwareIM. To do this:
 1. Double click on the node in the Elements tree representing your business space. The Business Space Editor will come up
 2. Tick the "Business space will use Data Maestro checkbox
 3. Click on the Help button and read the information carefully. it explains which information you need to provide.
 4. Select business objects, attributes and/or business object groups that you want Data Maestro to know about
 5. Enter the appropriate instructions as recommended in the Help section
2. Once all the information has been provided click on the Deploy button
3. You will then receive an email from Awaresoft that will contain the details of your account.
4. Once you receive the details go back to the Business Space Editor, click on the SYSTEM VALUES button and enter these details into the dialog that pops up
5. Save the changes

Now you need to allocate a place in your application that will show the chatbot window for the Data Maestro. This can be done either in the Left or Right frames of a visual perspective. The standard approach is described below:

1. Make the frame visible and select "Data Maestro" in the "Displays" property of the frame.
2. Set "Initial Size" (in this case width of the frame)
3. Tick the Can be resized property
4. Tick the Collapsible property
5. Tick the Collapsed Initially property
6. In the top menu define a menu item of the Toggle visibility of the right frame type
