Condition 2

Condition

A condition is an [expression](#) in the [rule language](#) which result is either true or false. Examples of conditions:

```
Order.State = 'Approved'
```

```
Account.Holder.Age < 18
```

```
Customer.Name IS UNDEFINED
```

```
LineItem WAS ADDED TO Order.Items
```

Conditions are an essential part of [rules](#), where they determine when the rule [actions](#) need to be executed, and of [queries](#) where they specify which [business objects](#) to find. Conditions are also used for [conditional elements](#) in [reports](#) and [presentations](#) to specify how a particular element should be displayed.
