Configuration Tool 2

Configuration Tool

Configuration Tool is the editor of configuration information for a [business space](#). It is a component of **Aware IM** that allows a user to work with configuration of business spaces, [business space versions](#) and the elements such as [business objects](#), [processes](#), [rules](#) and others. Configuration Tool connects to [Aware IM server](#) to request the necessary configuration information and submit the modified information back to the server.
