Rule 2

Rule

A rule specifies one or more [actions](#) that should be executed when the rule [conditions](#) are met. The conditions are optional and if none are specified the actions are executed unconditionally. In other words a rule states what should happen and when. **Aware IM** follows the rules defined by the [configurator](#) to manage the [business space](#) in the [operation mode](#). Rules can perform a variety of tasks. They can create [business objects](#), perform calculations, create or print documents, display information, exchange data with other software, etc.
