Business space 2

Business space

A business space is a container of all information and rules on processing the information that a business organization, or an individual, may need to manage. **AwareIM** manages a business space according to the instructions provided by a [configurator](#) in the [configuration mode](#). Regular users [login](#) into the business space in the [operation mode](#) to work with operational information. A business space is therefore a combination of both configuration instructions and operational data.

All configuration elements, such as [business objects](#), [processes](#), [rules](#) and others, belong to a business space. They reflect the unique requirements of the organization, or individual, and can be adjusted as often as necessary to accommodate changes in the requirements.
