Business space documentation 2

Business space documentation

On request of a **Configurator *AwareIM*** will generate a complete self-containing documentation of a **business space**. The documentation contains details of all **business objects**, **processes**, **rules** and other configuration elements specified in the business space. The generated document can be stored electronically and used by anyone without access to **Aware IM**. It can be searched for information of interest, printed out, filed away, used for audit purposes, etc.

The document is generated for a given **business space version**. It is recommended to generate and keep documentation for each **published** version. This will allow keeping track of the information and rules that were in effect at a given time in the past.
