Logout 2

[Index](#), [Glossary](#), [Logout](#), [Operation Mode](#), [Business Space](#)

Logout

Logout is a process of a user leaving a [business space](#). In the [configuration mode](#) the [configurator](#) logs out by closing [Configuration Tool](#). In the [operation mode](#) users click on the Logout link or **AwareIM** automatically logs them out after a certain period of inactivity.

It is strongly recommended that users logout when finishing their work with the system, especially if they use a computer that belongs to someone else. This will prevent unauthorised access to the system.
