Object form

An object form is one or more pages displayed for users in the [operation mode](#) to view and edit a [business object](#). The form shows [attributes](#) of the object according to their [type](#) and the appearance settings specified by a [configurator](#). Object forms can have one or several [sections](#), each section can be either [auto-generated](#) or [custom](#). [Presentations](#) offer an alternative way of displaying, but not editing, object information.
