exportEntities (IProcess, IEntity [], String, ExportOptions) 2

[Programmers Reference](#), [Methods](#), [IExecutionEngine Interface](#), [IExecutionEngine Interface Methods](#), [exportEntities](#)

exportEntities (IProcess, IEntity [], String, ExportOptions)

```
public void exportEntities (IProcessparent, IEntity [] entsToExport, String
exportFileName, ExportOptions options)
throws AccessDeniedException, ExecutionException;
```

This method exports the specified instances of the specified business object into the specified file (see also [Export and Import](#)).

Parameters

entsToExport	the instances of the business objects to be exported
exportFileName	the full path to the file to export to
options	the export options (whether to export ID's, relationships, binary attributes etc)
