getExpressionValueForCalcs (String) 2

[Programmers Reference](#), [Methods](#), [IDocumentDataSource Interface](#), [getExpressionValueForCalcs](#)

getExpressionValueForCalcs (String)

```
public Object getExpressionValueForCalcs (String expression)
throws Exception
```

This method is very similar to the [getExpressionValue](#) method. The only difference is that the resulting value is not converted into any presentation format.

Parameters

expression	the text of the expression. This is the text that is contained inside a tag (not including tag symbols)
------------	---

Returns

The value of the expression - possible types of the Java object are presented in the table of the correspondence between attribute and Java types in [Appendix A](#).
