getInputSourceClassName () 2

[Programmers Reference](#), [Methods](#), [IChannelType Interface](#), [getinputsourceclassname](#)

getInputSourceClassName ()

```
public String getInputSourceClassName ()
```

This method must return the fully qualified name of the Source that handles communication with the external software system or device (see also [Implementing Channel's Source and Sink](#)). If messages from the external system or device are never received (only sent to), null should be returned.
