getLoadedResources () 2

[Programmers Reference](#), [Methods](#), [DataPresentationTemplate Class](#), [DataPresentationTemplate Class Methods](#), [getLoadedResources](#)

getLoadedResources ()

```
public BinaryResource [] getLoadedResources ()
```

This method retrieves any resources that the document may have that are stored outside of the document template file (for example, images, fonts etc).

Parameters

none

Returns

the external resources as the BinaryResource structures or null if the document template has no external resources.
