## getName () / IChannel

```
public String getName ()
```

This method must return the unique name of the channel within the **AwareIM** system. This is the name that can be used by the [executeEntityService](#) and [sendNotification](#) methods of the [IExecutionEngine](#) interface and the [REQUEST SERVICE](#) and [SEND](#) actions of the [Rule Language](#). This name is for system purposes only – it is not displayed in the list of available channels of the intelligent business object in the Configuration Tool.
