getOutputSinkClassName () 2

[Programmers Reference](#), [Methods](#), [IChannelType Interface](#), [getoutputsinkclassname](#), [Index](#)

getOutputSinkClassName ()

```
public String getOutputSinkClassName ()
```

This method must return the fully qualified name of the Sink that handles communication with the external software system or device (see also [Implementing Channel's Source and Sink](#)). If messages are never sent from **Aware IM** to the external software system or device (only received), null should be returned.
