setAttributePaths (String [] attributePaths) 2

[Programmers Reference](#), [Methods](#), [DataPresentationTemplate Class](#), [setAttributePaths](#)

setAttributePaths (String [] attributePaths)

```
public void setAttributePaths (String [] attributePaths)
```

This method sets attribute paths used inside tags in the document template. The attribute paths are represented in the form `objectName.attributeName`. Note that the paths returned are not necessarily the complete expressions used inside the tags. A tag expression may contain not only the attribute paths, but also arithmetic expressions with these paths. This method is usually called from the [initialiseTemplate](#) method of the [IDocEngineClient](#) interface.

Parameters

attributePaths	the attribute paths used in the document template
----------------	---
